DISCLAIMER

For all Inkjet Models :

*1 Document print speeds are the average of ESAT (Word, Excel, PDF) in Office Category Test for the default simplex mode, ISO/IEC 24734.

Photo print speed is based on the default setting using ISO/JIS-SCID N2 on Photo Paper Plus Glossy II and does not take into account data processing time on host computer. Print speed may vary depending on system configuration, interface, software, document complexity, print mode, page coverage, type of paper used etc.

*2 PPM print speed is based on the highest speed settings using Canon standard patterns as described below on A4 plain paper.

*3 The page yield (A4 size) is based on the consumption data from the succeeding ink bottle but not the first ink bottle. Page yield is the estimated value based on Canon individual test method using the ISO/IEC 24712 chart under ideal print conditions & continuous printing simulation with the replacement after initial setup. Mentioned print yield is from the replacement set of 4-ink bottles (C/M/Y/BK).

Page yield varies significantly depending on contents printed and other factors.

Note : For G570 and G670 the condition would apply for a set of 6-ink bottles (C/M/Y/BK/Red/Grey)

*4 The page yield (A4 size) is based on the consumption data from the succeeding ink cartridge but not the first (pre-installed/in-box) ink cartridge.

For ink cartridge, the declared yield value is in accordance with ISO/IEC 24711, using the ISO/IEC 24712 colour chart. Values obtained by continuous printing under ideal print conditions.

Page yields may vary depending on content coverage, print settings, temperature, humidity, and frequency of printing.

*5 Refer details on operating system compatibility at <https://in.canon/en/support> typing the model number.

*6 Monthly Duty Cycle value provides a means of comparison for product robustness in relation to other Canon printers and does not refer to actual maximum image output per month.

Note : For detailed disclaimers please visit the respective product page of the PIXMA and MAXIFY printer models.
